Professional Summary

Accomplished Lead Solution Engineer with succesfull and comprehensive experience in payment SDK and full-stack development. Proficient in steering high-stakes projects from conception to deployment, enhancing application performance, and implementing scalable solutions that align with business goals. Specialised in cutting-edge front-end technologies such as React and Next.js, coupled with robust knowledge of backend systems, cloud integrations, and mobile app development. Demonstrated ability to elevate team productivity, streamline processes, and consistently deliver superior solutions that exceed client expectations.

Total Experience: *5+ Years of hands-on industry experience.*
Key Skills: *React.js, Next.js, Node.js, JavaScript, TypeScript, Python, C#, MongoDB, SQL, Unity, Blockchain, Cloud .*

Professional Experience

Cloudberry360 — Jan 2024 - Present

Lead Solution Engineer — *Bangalore, Karnataka, India*

- Engineered a robust JavaScript Payment SDK supporting PayPal, Volt, Google Pay, and Apple Pay.Led cross-functional architecture discussions, aligning backend and front-end strategies with business objectives, reducing project delivery time by 20% and ensuring seamless integration.
- Enhanced application performance by 50% through front-end architecture optimization, reducing bundle sizes, and eliminating redundant API calls, resulting in significantly faster load times and improved user experience.
- Pioneered a JSON-driven dynamic web architecture, enabling real-time customization of both UI styling and business logic from the backend.Integrated BunnyCDN to optimize content delivery, reducing page load times drasticaly.
- Developed a fully-featured rich text editor from scratch, improving user engagement by 25% and enabling seamless content creation and editing on the platform.
- Mentored and led a team of junior developers, establishing high coding standards and conducting code reviews that improved code quality and reduced bugs by 30%.
- Implemented milestone-based project management, leading to the successful on-time delivery of major projects and optimising resource allocation.
- **Main Clients:** Lyca productions, Apexx Global

IBS Software — Nov 2021 - Jan 2024

Lead Solution Engineer — *Kochi, Kerala, India*

- Architected a complex React application integrating Redux, Flux, and Recoil, improving state management and reducing application crashes by 25%.
- Led the redevelopment of a critical mobile application using React Native .
- Scaled backend services with Node.js, Express, and MongoDB, achieving better efficiency in API response times and enhancing system reliability under high load.
- Integrated automated CI/CD pipelines using Jenkins, reducing deployment times by 15% and deployment errors by 20%.
- Collaborated with cross-functional teams and clients to gather requirements and provided technical solutions, increasing client satisfaction and retention .
- Optimised frontend and backend architecture to align with business objectives, reducing project delivery time.
- **Main Clients:** KoreanAir, KoreanApp, Skypak Tours, Japanese Airlines

Panasonic Global R&D Lab — May 2019 – Sept 2021

Engineer / Systems & Software Junior Architect — *Infopark, Kochi*

Human Thermal Simulation Platform: Kochi, Osaka (Japan), Singapore

- Led the design and implementation of high-complexity software systems, enhancing architecture and scalability.
- Developed web apps with React, ASP.NET, Node, and Express, integrating blockchain for security.
- Experience in designing, managing, and troubleshooting hardware, OS, LAN and Microsoft Office
- Optimised MySQL and MongoDB queries, improving data retrieval times.
- Conducted advanced R&D in Blockchain, Python, Unity 3D, and AI, leading to innovative prototypes.

Human Clone & Digital Mobile Assistant Platform: Panasonic Kochi, Squas Solutions

- Architected secure Android applications with blockchain integration, enhancing security through TEE.
- Successfully developed and deployed a prototype application in Android Studio.
- Enhanced UI/UX by integrating Material UI and Firebase.
- **Main Clients:** Panasonic Life, Squas, Redenatics

Education

Dual Degree Master Of Computer Application (Thesis) - Computer Science **Jun 2014 – Aug 2019**

Mahatma Gandhi University *Kottayam, Kerala, India*

- Dual Degree Master of Computer Application (Integrated Masters) in Computer Science, with a focus on advanced cryptography and blockchain technologies.
- Research publication: Developed a cryptographically secure authentication system (MEMNP) published in the university journal.
- Institution: Sree Narayana Guru Institute of Science and Technology.

Technical Skills

Programming Languages	JavaScript | TypeScript | C# | Python | Kotlin | Solidity | Ruby | PHP | VB | C | C++ | Java
	HTML and CSS (Foundation Framework, Tailwind, and Bootstrap)
Web Technologies	React (Redux,RTK Query, Axios, RxJS, Thunk, Flux, Recoil, Jest) | Node (Winston, dotenv
	Nodemon, Jose,ByCrypt, JWT, EJS, PUG, PM2 | Next.js | API (REST API, GraphQL)
	Fastify | Angular | ASP.NET | Flask | WebSocket | Express
Database	SQL: MySQL, SQLite | NoSQL: MongoDB | NewSQL: CockroachDB
Cloud	Google Firebase | Supabase | BunnyCDN
Object Map	ORM: Prisma, Sequelize | ODM: Mongoose
Application	Android Studio | Xcode | React Native | Unity (2D, 3D, Vuforia (AR)) | Android
Blockchain	Truffle Suite | Remix | Infura | web3.js
Project and Code Management	Jira | Bitbucket | TortoiseSVN | MySQL Workbench | GitHub | GitLab | Visual Studio
	VS Code (Prettier, ESLint) | Visual Studio | VPN (CISCO AnyConnect, GlobalProtect)
Office Management	MS Word | Visual Studio | MS PowerPoint | MS Excel | MS Outlook | Teams
Server Ops and Deploy Tools	FileZilla | PuTTY | Jenkins

Projects

Donate Organ (DONORG)

Kerala Blockchain Academy *Trivandrum, Kerala*

- Engineered a decentralised organ donation platform on Ethereum, utilising Solidity and web3.js. | View
- Stack: Solidity, Node.js, Truffle Suite, Remix, Infura, web3.js.

Multi Secured Encrypted Mirror Negative Password (MEMNP)

MG University *Kottayam, Kerala*

- Developed an advanced cryptographically secure authentication system using negative passwords.
- Research published in the university's cryptography journal, contributing to academic discourse in cybersecurity.
- Stack: Python (Cryptography).

Diet Doctor

MG University *Kottayam, Kerala*

- Developed a BMI calculator website with a focus on regional dietary plans.
- Stack: ASP.NET, MySQL.

Certifications and Course Achievements

Certified Ethereum Developer **01/2021 - 04/2021**

Kerala Blockchain Academy *Trivandrum, Kerala*

- Achieved certification in Ethereum development, by mastering Truffle Suite, Remix, Infura, and web3.js | View

Certified Blockchain Associate **06/2019 - 09/2019**

Kerala Blockchain Academy *Trivandrum, Kerala*

- Certification in Blockchain protocols, focusing on distributed ledger technologies and their applications | View

Certified Full Stack Developer **06/2018 - 12/2018**

ICT Academy, Kerala *Kochi, Kerala*

- Completed full-stack development certification, with a focus on MERN stack and Python Flask.

Certified ASP.NET Developer **06/2018 - 12/2018**

LCC *Aluva, Kerala*

- Certified ASP.NET Developer, mastering C#, ASP.NET, and SQL for enterprise-level applications.

Honours and Awards

- **IBS**: Performance Award Debutant - H2 | Team Champ Award: 2022 | Team Champ Award: 2023
